

## Carbon Reduction Plan guidance

### Notes for completion

Where an in-scope organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required, as a condition of participation, to submit a CRP which details their organisational carbon footprint and confirms their commitment to achieving net zero by 2050.

CRPs are to be completed by the bidding supplier and must meet the reporting requirements set out in supporting guidance and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve net zero emissions by 2050.<sup>11</sup>

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a CRP covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard<sup>12</sup> and Guidance, and all of the following criteria are met:

- the bidding entity is wholly owned by the parent
- the commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity
- the environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract
- the CRP is published on the bidding entity's website

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's CRP may only be a temporary measure to satisfy this particular condition of participation.

The CRP should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the objectives of the CRP within their strategic plans.

A template for the CRP is set out below. Please complete and publish your CRP in accordance with the reporting standard published alongside this PPN.

.

<sup>11</sup> 'Bidding supplier' or 'bidding entity' means, for the purpose of this guidance, the organisation with whom the Contracting Authority will enter into a contract if it is successful.

MICHAL BLANCE LIMITED

Publication date

12 March 2026

## Commitment to achieving net zero

**[MICHAL BLANCE LIMITED]** is committed to achieving net zero emissions by 2050.

## Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2025

Additional details relating to the baseline emissions calculations:

**[Enter details]**

Baseline year emissions:

| Emissions                  | Total (tCO <sub>2</sub> e) |
|----------------------------|----------------------------|
| Scope 1                    | 0.46                       |
| Scope 2                    | 0.00                       |
| Scope 3 (included sources) | 7.22                       |
| Total emissions            | 7.68                       |

## Current emissions reporting

Reporting year: 2025

| Emissions                  | TOTAL (tCO <sub>2</sub> e) |
|----------------------------|----------------------------|
| Scope 1                    | 0.46                       |
| Scope 2                    | 0.00                       |
| Scope 3 (included sources) | 7.22                       |
| Total emissions            | 7.68                       |

## Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **6.98** tCO<sub>2</sub>e by 20**30**. This is a reduction of **9.11%**.

## Carbon reduction projects

### Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented since the **2025** baseline. The carbon emission reduction achieved by these schemes equate to 00 tCO<sub>2</sub>e, a 00 % reduction against the **2025** baseline and the measures will be in effect when performing the contract.

**This is the first carbon reduction plan due to the base line year.**

### Future carbon reduction initiatives

In the future we hope to implement further measures such as:

**[Remote Meetings, Flexible/hybrid working patterns,**

**promoting use of non-polluting vehicles for daily commute**

**(cycles or electric vehicles)]**

## Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>13</sup> and uses the appropriate government emission conversion factors for greenhouse gas company reporting.<sup>14</sup>

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.<sup>15</sup>

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

**Signed on behalf of the supplier: MICHAL BLANCE LIMITED**
